

PENCIL RACER

BetelnutGames.com

This track is dedicated to the world's greatest pencil racer and track designer, Steve Davidson.

1. Draw a racetrack. **2.** Take turns. **3.** On a player's first turn they begin with their pencil in the checkered flag, behind the Start line. **4.** The player closes her eyes and draws a path, trying to stay within the racetrack and avoiding all obstacle (barrels, boxes, berms, etc.). **5.** The other players watch and say "stop" or "crash" when the driver goes off the road or hits something. **6.** The spot where the driver crashed is marked with an "x", and the next player goes. **7.** On the player's next turn, they begin with their pencil on the spot where they last crashed. **8.** First driver over the finish line wins.
