On Game Play:

finding similar items on Amazon. Books? Cooking gear? How about a would make your year better? Tools? you need for basic survival. What _Remember, the island has everything lighter? You can estimate weights by

Game Variations:

- other person. Who? Passenger: You may also bring one
- Lower Energy: 100 pounds of stuff.
- aliens, etc. Add Danger: weather, monsters,
- months? More/Less Time: Two years? Three
- Quick play: 10 minutes to make
- about it. Solo Play: Keep your list. Think

_Your spaceship has a replicator

that can

machine on board

materialize any items you want,

_Your spaceship's power is low.

And it's sinking very slowly.

_You have just enough power to

make 90kg of stuff (200 pounds).

_Make a list of what you take onto the island for your one-

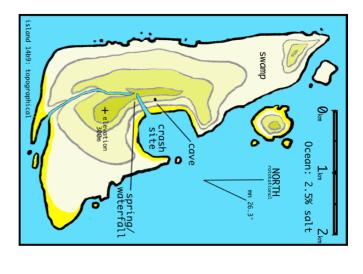

_Then the ship sinks.

_Compare lists with the other

year stay.

_Best list wins.

Tips -

It is helpful to label the list pages by type (e.g. - bedding, cooking, tools, shelter, entertainment, etc.). Keep the total weights for each page here to track your progress.

Game Setup:

- _Your spaceship malfunctions. You send a distress signal, and your ship sensors detect a nearby water planet where you can crash-land. It will take ONE YEAR for the rescue ship to come.
- _Your ship splashes down next to a habitable island with edible fruit and animals, fresh water, and a saltwater ocean. The weather can be stormy, but otherwise stays between 19° and 24° Celsius (66° 75°F). If you had to, you could survive the whole year with nothing but what is on the island.
